Windows 10

ColdKey runs as a tray icon in the Windows Explorer shell. With ColdKey, there is one tabbed dialog with lists of over 350 different hot-keys. Simply check the hot-key combinations that you want to disable and that's it!

Different than Secure Desktop

Secure Desktop has always been a product designed as a full desktop security solution. ColdKey is our solution for customers who just want to disable various hot-key combinations. Period.
